PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8717 SESSION NUMBER: 02

DATE OF SESSION: 22 Dec 87 DATE OF REPORT: 5 Jan 88

START: 0920 END: 1030

METHODOLOGY: SOLO VIEWER IDENTIFIER: 003

1. (S/NF/SK) MISSION: Access and describe the target structure(s) of special interest at 580291/856562 and describe the scope and nature of the activities associated with the target structures.

2. (S/NF/SK) VIEWER TASKING: Re-access the two target structures of specific interest surface during Session 01 and describe the functional purpose of the structures, describe the interior of the structures, address the dimensional aspects of the structures, and using the two target structures as a central point of focus, provide an overview of supporting structures perceived in the target area.

003 3. (S/NF/SK) COMMENTS: No physical inclemencies noted. Viewer 079 appeared to have a successful mission. Appropriate sketches were submitted in support of his findings.

Summary

Site involves structures, one of which at least is incomplete. Inside there is something that is lighted, amber, green, glassy, smooth; the interior of the structure overall is dim. There is a sense of "headquarters" and "modernizing", as well as the ideas of observing, technical, electronic, and solid state. "Lattice" and "not-moving" are also involved. The area where the structures are is like it's a part—"in the corner"—of a larger enclave, but separated off by itself for its own purposes—"elitist" or "sacrosanct" or something similar. There seem to be three structures that are relevant in this selected area, all mutually dependent and supportive. One is the "operational" structure which is not completed, one is the "admin" structure, and one, a smaller one, has the impression of maintenance and "just in case" about it. There is also the impression of a "sub-station" sort of construct at a slight distance from the other structures that gives the idea of a dedicated power supply. Inside the admin structure is many little office-like rooms; inside the ops structure it is fully technical, aimed at mission; the third structure involves reserve, training, maintenance, routine, fallback. The activity involved seems laid-back, passive, relatively non-detectable by normal senses, "like" it has to do with the electro-magnetic spectrum. There is a military/civilian mix, primarily military, with the sense of a "general officer" present. Sense of tracking and high altitude.

monitoring

Sch like its part of a large enclosure, but separated  
off by itself for its own purposes - either a compound  
"Ausgleichshof" Compartment - in a corner of a large site.  
3 structures, seemingly redundant now in sheltered area, all  
internally dependent, supportive & resilient
